-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to a tamper evident and resealable bag, classified in class 383, subclass 5.
  - II. Claims 11-20, drawn to a method of manufacturing a tamper evident and resealable bag, classified in class 53, subclass 412.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the bag can be made by folding a single sheet to form the looped header and then applying at least one pair of reclosable portions extending in opposing fashion.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. During a telephone conversation with applicant's attorney Mr. McEvoy on March 01, 2005 a provisional election was made without traverse to prosecute the invention of I, claims 1-10. Affirmation of this election must be made by applicant in replying to this Office action. Claims 11-20 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Strand et al. (6,360,513). Strand '513 discloses a tamper evident and resealable bag, comprising: a first sheet and a second sheet of plasticized material, said sheets being secured together along opposite extending side edges; at least one pair of reclosable portions (male and female profiles) extending in opposing fashion and proximate a top extending edge of said sheets of material; a looped header portion (upstanding panels 36 & 38 that are joined together to form a pocket) extending from said reclosable portions along a selected distance corresponding to said top; and a zipper (20) secured over said reclosable portions in proximity to said looped header portion (hood 11) at

least one item being pre-inserted into an open bottom established between said opposite extending sides of said first and second sheets and prior to sealingly engaging said bottom. See Figures 1-29 embodiment and column 8, lines 53-57.

With respect to claims 2 and 4, note the first and second extending slots in Figure 4 embodiment.

With respect to claim 3, note the first and second pairs of reclosable portions (20 & 40) extending in spaced apart fashion along said top in Figure 6 embodiment.

With respect to claim 7, note end stops (23) in Figure 6 embodiment.

The product-by-process limitations in claims 9 and 10 results in no structure that is different from Strand '513.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are tamper evident and resealable bags analogous to applicant's instant application.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jila M Mohandesi whose telephone number is (571) 272-4558. The examiner can normally be reached on Monday-Friday 7:30-4:00 (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (571) 272-4562. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
